DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22 and 51-60, drawn to a breathable mask arrangement with an area requirement, classified in class 128, subclass 206.27.
 - II. Claims 23-33, drawn to a breathable mask arrangement with a total mask force requirement, classified in class 128, subclass 207.11.
 - III. Claims 34-46 and 66-74, drawn to a breathable mask arrangement with a contact force requirement, classified in class 128, subclass 204.18.
 - IV. Claims 47-50, drawn to breathable mask arrangement having an area requirement and a displacement requirement, classified in class 128, subclass 206.24.
2. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions each have separate utility such separate/distinct masks designed to function under each of the conditions as claimed. As recited on page 6 of the current application, masks may be prepared according to a predetermined force that may be a function of mask pressure, displacement, or both mask pressure and displacement. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3743

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: figures 4-11

Species B: figure 12

Species C: figure 13

Species D: figure 14

Species E: figure 15

Species F: figure 16

Species G: figure 17

Species H: figure 18

Species I: figures 21-24

Species J: figures 25

Species K: figure 26

Species L: figure 27

Species M: figure 28

Species N: figure 29

Species O: figure 30.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, with respect to species A-O all the independent claims except 61, 75, and 86 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3743

In addition to dependent claims drawn to distinct species, it appears that independent claims 61, 75, and 86 are also drawn to distinct species. So once a subcombination group is elected, one single species must be elected, wherein claims are only drawn to the elected subcombination and single species.

6. A telephone call was made to Glenn Perry on Thursday, August 29, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
